

General Description:

The DDF 2800 offers the ultimate digital to digital remote download. With unparalleled upgrade ability, the DDF 2800 uses a PC compatible 56k modem plug in card that allows the DDF 2800 to be easily upgraded to a faster modem without redesigning the machine.

Features:

- **Built-In Fax Switch** – Provides dealer with the uninterrupted ability to download to the unit 24 hours a day 7 days a week. This feature does not add additional fees to the end user's monthly phone bill.
- **Ring Back** – Premier's exclusive ring back feature lets the 2800 share any phone line. This is highly useful in the absence of a dedicated fax line.
- **Digital Downloading** – The DDF 2800 is loaded digitally over the telephone line using an internal 56k modem. As modem technology inevitably improves, Premier's manufactured in "upgrade ability" allows our production to easily switch to faster modems. Units are completely field upgradeable.
- **Separate Music and Messaging** – Music and messages can be loaded and erased separately. Now customers can get one message or music changed without reloading an entire new production.
- **Optional Message Play List** – This list selects which messages to play, and their play order. The order of the messages can be set to play certain messages once and others more often depending on the customer's needs. Messages can also be turned off and on by the dealer rather than erasing and reloading new messages. Up to 99 messages can be stored on the system.
- **Flash Memory** – The DDF 2800 uses the latest version of non-volatile NAND flash memory allowing the unit to never lose its recording in a power failure. The DDF 2800's NAND flash memory can store messages of any length provided they do not exceed the total memory time of the machine. Other memory types store and erase messages in 16 second blocks. Therefore, a 17 second message needs 32 seconds of memory. This raises costs by forcing the dealer to buy machines with additional memory.
- **Crystal Clear Sound Quality** – Our true 112 kbps sampling rate assures the highest quality playback of your messages.
- **Zero Gap** – The DDF 2800 eliminates any silence between the end of the production and the beginning so customers on hold do not hear any dead air.
- **Assured Security** – A 10 digit security code guarantees security for the end user and the dealer.

DDF 2800 Series

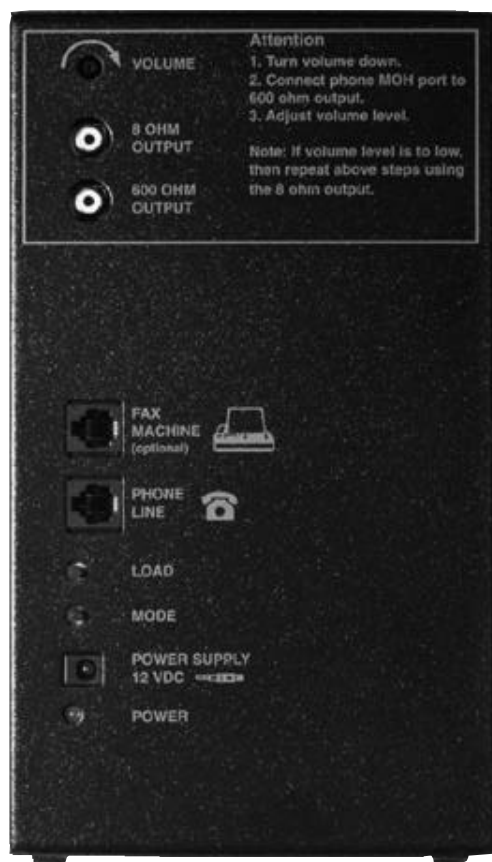

Digital Remote On-Hold Unit With Built-In Fax Switch

Dealer/End-User Benefits Of Digital To Digital Remote Technology

- **Immediate Updates** – Individual messages and/or music beds can be updated with ease, 24 hours a day, 7 days a week.
- **“Hands Free”** – End-users need not concern themselves with the operation of the machine, or the loading of the messages- this is done remotely by your dealer!
- **Unparalleled Sound Quality** – Premier’s truly digital to digital system assures the customer will enjoy unsurpassed sound quality.

Technical Specifications

Dimensions:	11" x 3.75" x 7.7"
Digitizing Rate:	112 Kbps.
Recording Times:	4, 6, 8, 12, 16, 24, and 32 minutes of memory.
Memory Type:	Non-volatile NAND flash memory – any length message can be recorded and erased on it.
Recording Methods:	The DDF 2800's are loaded with Premier's SAS 2000 software.
Power:	12 volt DC included.
Output Modes:	600 OHM & 8 OHM (note: 8 OHM output has a 5 watt amplifier).
Security:	There is a dealer definable 10 digit security code to prevent unauthorized entry. The code is held permanently in NAND flash memory.

Warranty

Upon receipt, the manufacturer will repair or replace, at its option, for a period of three years from the date of purchase, any system that proves defective in materials or workmanship. The manufacturer is not liable for indirect, incidental, or consequential damages in connection with the use of this product. This limited warranty does not include labor for installation or removal of the unit.
